SHORT COMMUNICATION

The census database at the Western Australian Herbarium (PERTH), which provides the nomenclature for the website *Florabase* (Western Australian Herbarium 1998–), lists current names and recent synonymy for Western Australia’s native and naturalised vascular plants, as well as algae, bryophytes, lichens, slime moulds and some fungi. The names represented in the census are either sourced from published research or denote as yet unpublished names based on herbarium voucher specimens. We herein summarise the changes made to vascular plant names in this database during 2023.

Sixty four taxa were newly recorded for the State, of which 11 are naturalised and 29 have been added to the Threatened and Priority Flora list for Western Australia (State of Western Australia 2023; Western Australian Herbarium 1998–) (Table 1). A total of 105 name changes were made, including the formal publication of 26 phrase-named taxa (Table 2). Plant groups for which several name changes were made include *Drosera* L. (Krueger *et al.* 2023; Lowrie *et al.* 2017), *Leptospermum* J.R.Forst. & G.Forst. (Wilson & Heslewood 2023), and Rutaceae (Duretto *et al.* 2023). Several new names were added in *Hibbertia* Andrews (Hammer 2023; Thiele 2023; Thiele & Hammer 2023a; 2023b), and the genus *Pigea* Ging., an earlier generic name for *Hybanthus* Jacq., was reinstated (Forster 2021). New genera to Western Australia in 2023 include *Aggrefflorum* Peter G.Wilson, *Apectospermum* Peter G.Wilson, *Brownseya* Li Bing Zhang, L.D.Sheph., D.K.Chen, X.M.Zhou & H.He, *Gaudium* Peter G.Wilson, and existing genera newly recognised in Western Australia include *Diplacrum* R.Br. and *Leptospermopsis* S.Moore. Table 2 also includes cases where there has been a change of taxonomic concept, misapplication, exclusion, or rank change.

Table 1. New records added to Western Australia’s vascular plant census during 2023. *in litt.* = in correspondence; *in sched.* = on herbarium sheet/label; * = naturalised; T, P1–P4 = Conservation Codes for Western Australian flora (State of Western Australia 2023; Western Australian Herbarium 1998–).
